Diseases	Cases	Deaths
Rubella	119	0
Acute hemorrhagic conjunctivitis	2,218	0
Leprosy	28	0
Typhus	155	0
Kala azar	21	0
Echinococcosis	209	0
Filariasis	0	0
Infectious diarrhea [§]	64,241	1
Hand, foot and mouth disease	113,473	0
Total	565,663	2,321

* The number of deaths of Acquired immune deficiency syndrome is the number of all-cause deaths reported in the month by cumulative reported AIDS patients.

† The data were from the website of the National Health Commission of the People's Republic of China.

§ Infectious diarrhea excludes cholera, dysentery, typhoid fever and paratyphoid fever.

The number of cases and cause-specific deaths refer to data recorded in National Notifiable Disease Reporting System in China, which includes both clinically-diagnosed cases and laboratory-confirmed cases. Only reported cases of the 31 provincial-level administrative divisions in the mainland of China are included in the table, whereas data of Hong Kong Special Administrative Region, Macau Special Administrative Region, and Taiwan are not included. Monthly statistics are calculated without annual verification, which were usually conducted in February of the next year for de-duplication and verification of reported cases in annual statistics. Therefore, 12-month cases could not be added together directly to calculate the cumulative cases because the individual information might be verified via National Notifiable Disease Reporting System according to information verification or field investigations by local CDCs.
