Diseases	Cases	Deaths
Rubella	33	0
Acute hemorrhagic conjunctivitis	1,856	0
Leprosy	24	0
Typhus	45	0
Kala azar	18	0
Echinococcosis	311	0
Filariasis	0	0
Infectious diarrhea [¶]	125,289	0
Hand, foot and mouth disease	9,093	0
Total	1,594,723	1,674

* According to the National Bureau of Disease Control and Prevention, not included coronavirus disease 2019 (COVID-19).

[†] The number of deaths of acquired immune deficiency syndrome (AIDS) is the number of all-cause deaths reported in the month by cumulative reported AIDS patients.

[§] Since September 20, 2023, Monkey pox was included in the management of Class B infectious diseases.

[¶] Infectious diarrhea excludes cholera, dysentery, typhoid fever and paratyphoid fever.

The number of cases and cause-specific deaths refer to data recorded in National Notifiable Disease Reporting System in China, which includes both clinically-diagnosed cases and laboratory-confirmed cases. Only reported cases of the 31 provincial-level administrative divisions in the Chinese mainland are included in the table, whereas data of Hong Kong Special Administrative Region, Macau Special Administrative Region, and Taiwan, China are not included. Monthly statistics are calculated without annual verification, which were usually conducted in February of the next year for de-duplication and verification of reported cases in annual statistics. Therefore, 12-month cases could not be added together directly to calculate the cumulative cases because the individual information might be verified via National Notifiable Disease Reporting System according to information verification or field investigations by local CDCs.
