

## Notifiable Infectious Diseases Reports

### Reported Cases and Deaths of National Notifiable Infectious Diseases — China, April, 2020

Diseases	Cases	Deaths
Plague	0	0
Cholera	0	0
SARS-CoV	0	0
Acquired immune deficiency syndrome	5,960	1,587
Hepatitis	125,181	37
Hepatitis A	1,187	0
Hepatitis B	101,262	36
Hepatitis C	20,179	1
Hepatitis D	22	0
Hepatitis E	1,732	0
Other hepatitis	799	0
Poliomyelitis	0	0
Human infection with H5N1 virus	0	0
Measles	58	0
Epidemic hemorrhagic fever	540	1
Rabies	15	15
Japanese encephalitis	4	0
Dengue	6	0
Anthrax	16	0
Dysentery	3,695	0
Tuberculosis	85,684	96
Typhoid fever and paratyphoid fever	415	0
Meningococcal meningitis	5	0
Pertussis	479	0
Diphtheria	0	0
Neonatal tetanus	1	0
Scarlet fever	442	0
Brucellosis	5,360	0
Gonorrhea	6,267	0
Syphilis	46,728	11
Leptospirosis	2	0
Schistosomiasis	6	0
Malaria	54	0
Human infection with H7N9 virus	0	0
COVID-19*	995	31
Influenza	15,396	1
Mumps	6,169	0

Continued

Diseases	Cases	Deaths
Rubella	116	0
Acute hemorrhagic conjunctivitis	2,230	0
Leprosy	52	0
Typhus	63	0
Kala azar	26	0
Echinococcosis	362	0
Filariasis	0	0
Infectious diarrhea <sup>†</sup>	58,544	1
Hand, foot and mouth disease	3,001	0
<b>Total</b>	<b>367,872</b>	<b>1,780</b>

<sup>†</sup>The data were from the website of the National Health Commission of the People's Republic of China. The case number and death number do not include the revised additional cases of 325 and the revised additional deaths of 1,290 in Wuhan reported by the Wuhan COVID-19 Epidemic Prevention and Control Headquarters on April 17, 2020.

<sup>†</sup>Infectious diarrhea excludes cholera, dysentery, typhoid fever and paratyphoid fever.

The number of cases and cause-specific deaths refer to data recorded in National Notifiable Disease Reporting System in China, which includes both clinically-diagnosed cases and laboratory-confirmed cases. Only reported cases of the 31 provincial-level administrative divisions in the mainland of China are included in the table, whereas data of Hong Kong Special Administrative Region, Macau Special Administrative Region, and Taiwan are not included. Monthly statistics are calculated without annual verification, which were usually conducted in February of the next year for de-duplication and verification of reported cases in annual statistics. Therefore, 12-month cases could not be added together directly to calculate the cumulative cases because the individual information might be verified via National Notifiable Disease Reporting System according to information verification or field investigations by local CDCs.
