

Notifiable Infectious Diseases Reports

Reported Cases and Deaths of National Notifiable Infectious Diseases — China, June 2026*

Diseases	Cases	Deaths
Plague	0	0
Cholera	1	0
COVID-19	78,908	1
SARS-CoV	0	0
Acquired immune deficiency syndrome [†]	4,578	1,583
Hepatitis	136,295	253
Hepatitis A	2,276	0
Hepatitis B	115,796	28
Hepatitis C	14,816	224
Hepatitis D	29	0
Hepatitis E	2,777	1
Other hepatitis	601	0
Poliomyelitis	0	0
Human infection with noval influenza virus	2	0
Measles	76	0
Epidemic hemorrhagic fever	366	0
Rabies	33	23
Japanese encephalitis	1	0
Dengue	255	0
Monkey pox [§]	126	0
Chikungunya fever	41	0
Severe fever with thrombocytopenia syndrome	1,220	66
Anthrax	23	0
Dysentery	3,340	0
Tuberculosis	56,491	183
Typhoid fever and paratyphoid fever	478	0
Meningococcal meningitis	17	0
Pertussis	639	0
Diphtheria	1	0
Neonatal tetanus	0	0
Scarlet fever	2,425	0
Brucellosis	7,315	0
Gonorrhea	12,500	0
Syphilis	53,938	5
Leptospirosis	55	1
Schistosomiasis	0	0
Malaria	530	0

Continued

Diseases	Cases	Deaths
Influenza	592,906	1
Mumps	7,685	0
Rubella	46	0
Acute hemorrhagic conjunctivitis	2,069	0
Leprosy	24	0
Typhus	104	0
Kala azar	42	0
Echinococcosis	503	0
Filariasis	0	0
Hand, foot and mouth disease	257,993	0
Infectious diarrhea [†]	149,627	0
Total	1,370,653	2,116

* According to the National Bureau of Disease Control and Prevention.

[†] The number of deaths of Acquired immune deficiency syndrome (AIDS) is the number of all-cause deaths reported in the month by cumulative reported AIDS patients..

[§] Since September 20, 2023, Monkey pox was included in the management of Class B infectious diseases.

[¶] Infectious diarrhea excludes cholera, dysentery, typhoid fever and paratyphoid fever.

The number of cases and cause-specific deaths refer to data recorded in National Notifiable Disease Reporting System in China, which includes both clinically-diagnosed cases and laboratory-confirmed cases. Only reported cases of the 31 provincial-level administrative divisions in the Chinese mainland are included in the table, whereas data of Hong Kong Special Administrative Region, Macau Special Administrative Region, and Taiwan, China are not included. Monthly statistics are calculated without annual verification, which were usually conducted in February of the next year for de-duplication and verification of reported cases in annual statistics. Therefore, 12-month cases could not be added together directly to calculate the cumulative cases because the individual information might be verified via National Notifiable Disease Reporting System according to information verification or field investigations by local CDCs.
